

## AERIAL LIFTS

Each year, nearly 30 workers in the United States lose their lives to aerial lift accidents. In many of these incidents, the employee operating the equipment lacked proper operator training, did not follow safe operating procedures, or operated outside the limitations of the equipment. OSHA regulations hold employers responsible for ensuring that all employees who operate boom-supported, self-propelled, truck-mounted, or scissor lift machinery first receive proper training.

Certification involves a review of the lift's operator and safety manual, learning about operating hazards and responsibilities, demonstrating proper operation, and gaining familiarity with the system's controls. Training also informs workers of potential hazards to look for during pre-start and work zone inspections. Once an employee completes the initial course and demonstrates a sound understanding of the equipment's operations and controls, he or she receives a certificate of operation.

Recertification is required every three years at a minimum, or more frequently depending on personal safety records, equipment changes, and jobsite requirements. OSHA also requires employers to retrain employees who they witness operating a lift incorrectly.

RETTEW's Aerial Lift training course is customizable to your company's specific equipment types and requirements. Contact RETTEW today to schedule your Aerial Lift training. We offer both initial and recertification sessions. Training can take place at your facility or jobsite, allowing employees to participate in hands-on training with the same equipment they will use for their work.

## MARK YOUR CALENDAR!

- 8/11 SafeLand - Basic Safety Orientation
- 8/14 HAZWOPER, 8-Hr Refresher
- 8/14 First Aid, CPR, BBP, and AED
- 8/20 USDOT Shipping of Hazardous Materials
- 8/21 Hazard Communication, Right-to-Know, GHS
- 8/25 NSC - Defensive Driving
- 9/4 First Aid, CPR, BBP, and AED
- 9/14-15 OSHA General Industry Outreach
- 9/21-23 HAZWOPER Technician
- 9/21-25 HAZWOPER Site Worker
- 9/22 NSC - Defensive Driving
